

# CLEAR CREEK PARKWAY IMPROVEMENTS

SHAWNEE, KANSAS

## PROJECT DESCRIPTION

Shawnee issued a Request for Proposals and selected McClure for the preliminary concept, design, and construction services for the Clear Creek Parkway Improvements. Phase I included site evaluations, surveys, and research. Phase II included preliminary design-based off-site studies and reports, along with a preliminary construction cost estimate. Phase III incorporated preliminary designs with the City's feedback, submitting the detailed design and construction plans to the City, attending City meetings, and the bid process. Phase IV included services, inspections, staking, business and property owner's liaison, As-Built drawings, traffic control plans, and signage and pavement markings.

## PROJECT HIGHLIGHTS:

- Gleason Road extended from the south and the midpoint intersects with a roundabout at Clear Creek Parkway.
- The design provides motor vehicle connectivity within the corridor, enhancement of the City's recreation trails, and multiple connections to new and future facilities.

## COMPLETION DATE

2018

## COST OF SERVICES

\$699,000
