

CITYPLACE PARCEL III - THE APEX AT CITYPLACE

OVERLAND PARK, KS

PROJECT DESCRIPTION

McClure provided final site planning services, civil site improvement design services, stormwater detention design, sanitary sewer main extension plans, and sanitary sewer installation observation for a proposed multi-family apartment building with 370 units and 779 parking spaces (surface & garage spaces) on a 6.8 acre site located at CityPlace, in Overland Park, Kansas. McClure also provided survey services to prepare a final plat for the project.

PROJECT HIGHLIGHTS:

- Highlights include designing the required stormwater detention using a below ground ADS Storm-Tech modular detention system due to limited site area available to accommodate the stormwater detention.

COMPLETION DATE

September 2021
