

# NEW SOFTBALL FIELD AND BAND PRACTICE FIELD RELOCATION

UNIVERSTY OF MISSOURI | COLUMBIA, MISSOURI

## PROJECT DESCRIPTION

McClure provided civil and structural design services for a new Division I collegiate softball facility on the University of Missouri's campus. The new stadium was constructed in the University's main commuter parking lot. McClure assisted with demolition plans, stadium parking layout/grading, and layout of associated utility infrastructure including water, chilled water, steam, and sanitary services.

To offset the number of lost commuter parking stalls, McClure provided site lay-out and grading to restripe the existing asphalt Marching Mizzou practice field for parking, construct a parking lot expansion, and build a new asphalt practice field for Marching Mizzou along with a new band storage building and conductor's tower.

## COMPLETION DATE

2017
